### Updates

---

#### **Request Fixed in version 10.2.137.0101 (RFC: 12839)**

Automatic Update Facility

The automatic update procedure allows updates to reports, scripts, interfaces, etc. of Brilliant PMPRO. After every night audit a check is made for updates by calling a Cloud Web Service. The configuration for automatic updates in Brilliant PMPRO determines what happens when updates are available.

Possible setting are:

- Automatically install the updates

The update package is download and the content in automatically installed

- Download only

The update package is downloaded and not installed. A configured user group will be notified about the update and the update needs to be installed (started) manually via a menu item in Brilliant PMPRO

- Notify only

A configured user group will be notified about the update and the update needs to be downloaded and installed manually via a menu item in Brilliant PMPRO

Access to [FTP://Onpremiseupdate.itesso.com](ftp://Onpremiseupdate.itesso.com) and

<https://onpremiseupdateWebservice.itesso.com> must be allowed from the server
